PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and deploying web applications using React.js, JavaScript, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs, CRUD operations, JWT-based authentication, password reset workflows, API integration, and responsive user interfaces. Built applications including a recipe REST API, blogging platform, and authentication and password reset system. Strong analytical and problem-solving background with professional experience in technical research and documentation.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, React Router, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Middleware

Database: MongoDB, Mongoose

Authentication: JWT, bcrypt

Tools: Git, GitHub, Postman, VS Code, npm

Concepts: CRUD Operations, MVC Architecture, API Integration, Async/Await, Error Handling

PROJECTS

Recipe CRUD REST API | Node.js, Express.js, MongoDB

- Developed a RESTful backend API for managing recipes using Node.js, Express.js, and MongoDB with Mongoose.
- Implemented CRUD operations to create, retrieve, update, and delete recipe data through REST API endpoints.
- Structured the backend using a modular architecture with routes, controllers, and models for maintainable code.
- Tested and documented the API endpoints using Postman, including request methods, responses, and API functionality.

Technologies: Node.js, Express.js, MongoDB, Mongoose, REST APIs, Postman

Blogging Platform | React.js, Node.js, Express.js, MongoDB

- Developed a full-stack blogging platform with a React.js frontend and Node.js/Express.js REST API backend.
- Implemented REST API endpoints for managing blog posts, categories, and tags with MongoDB for data persistence.
- Integrated the React frontend with backend APIs using Axios and configured environment-based API URLs for deployment.
- Deployed the backend on Render and frontend on Vercel, with CORS configuration and production environment settings.

- Implemented backend security and API reliability measures using Helmet, Morgan, MongoDB sanitization, and rate limiting.

Technologies: React.js, Vite, JavaScript, Node.js, Express.js, MongoDB, Mongoose, REST APIs, Axios

Authentication, Authorization & Password Reset System | React.js, Node.js, Express.js, MongoDB

- Implemented user registration and login with bcrypt password hashing and JWT-based authentication.
- Implemented authorization using protected routes and middleware, allowing authenticated users to access restricted resources.
- Developed a forgot-password and password-reset flow using a secure reset token.
- Integrated email delivery through SMTP/Brevo to send password-reset emails containing the reset link/token.
- Connected the React frontend with the Node.js/Express backend and MongoDB for user authentication and account management.

Technologies: React.js, JavaScript, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, SMTP/Brevo, REST APIs, Axios

PROFESSIONAL EXPERIENCE

Patent Analyst | Molecular Connections, Coimbatore **March 2024 – May 2026**

- Conducted technical research and analytical evaluation of engineering documents with strong attention to accuracy and quality.
 - Worked with structured datasets and generated analytical reports using Microsoft Excel.
 - Collaborated with cross-functional teams while meeting quality standards and project deadlines.
 - Developed strong analytical, documentation, problem-solving, and communication skills through technical research and reporting.
-

EDUCATION

Bachelor of Engineering in Electronics & Communication Engineering Avinashilingam University, Tamil Nadu | 2019 – 2023

CERTIFICATIONS

- 🚩 MERN Stack Developer – GUVI
- 🚩 JavaScript Algorithms and Data Structures – GUVI
- 🚩 React Development – GUVI
- 🚩 MongoDB Basics – GUVI
- 🚩 Artificial Intelligence – Zen Crop Techno Solutions (ZCTS)
